

## Bale Mover TidyTryc Complete with QUADKIT

**£399.00**

Reference: TRYC1

### **Product description:**

Limited time offer, comes with QUADKIT worth £48 (Coupling hitch, clevis pin, spike caps, 6ft retractable ratchet stap and mudguards). This enables you to tow the TidyTryc behind a quadbike. The Tidy Tryc is designed for handling slices of different sized big square bales i.e. square, quadrants, midi and mini hesstons. The Tidy Tryc has an array of uses from manoeuvring straw bedding around buildings, to carrying hay out to feeders behind a quad bike. Dimensions 850mm wide, 970 mm from tip of spike to back of wheel, Height is 1790mm, but handles are adjustable. 995 mm long with hitch. Benefits Saving on hay/straw - With the price of small bales going up yearly, it would be a huge saving to purchase hay/straw as big square bales. Assuming you save £60/tonne when buying hay/straw in big square bales rather than small bales, you would save £900 per lorry load! Excellent quality - Fully galvanised mild steel frame. 8" high speed wheels, with taper bearings for trailer use. Easier portion control - The sliced nature of big square bales allows different sized sections to be easily distributed. This would not be possible with a round bale. Labour saving - Saves having to manually load heavy slices onto a wheelbarrow. Time saving - Saves time when loading, transporting and unloading. If you only save 5 minutes every day, (assuming The Tidy Tryc is used 200 days in a year) then you would save 17 hours per year! Tidy barn - No loose hay/straw falls off during loading, keeping barn tidy.
